At Mitsubishi we don't just test our production vehicles, we punish them. The world's toughest rallies are our training ground. This means that we have had to constantly evolve and improve, to stay ahead of the game.

DAKAR CHAMPION 12 TIMES OVER.

Universally acknowledged as the planet's toughest test of man and machine, the Dakar Rally has both tested and proven our technology. Through tortuous terrain,

THE WORLD'S TOUGHEST TRAINING GROUND

over 9000km of barely visible track have been repeatedly beaten, making Mitsubishi undisputed champion in the most inhospitable terrain. But to Mitsubishi, more important than the winning is the knowledge gained. This knowledge is built into our new Pajero Sport, ensuring that it is tough, durable and technologically advanced enough to move in a league entirely of its own.

PAJERO SPORT

Where adventure awaits or pleasure calls, that's where the Pajero Sport can be found. Born for off-road running, once you set it free nothing will hold it back. The new generation of Sports Utility Vehicle thinking, Pajero Sport fuses the fun and comfort of urban driving with the heavy hauling and terrain-conquering toughness of off-road excitement. This is where your journey begins.

Roads are those lines on the map where all the other cars stay. Convenient certainly, but is convenience all you want out of life? Set free from asphalt constraints, Pajero Sport shows its true form.

DEFINE YOUR DESTINATION

With a powerful 3.2-litre Direct Injection Diesel engine, supported by rugged 4WD and suspension, few places on earth are out of reach.

Whether highway cruising or bundu-bashing excitement is where you create it. Pajero Sport combines a powerful engine with a smooth, aerodynamic form that invites you to explore the limits. With the freedom to switch between rugged, aggressive 4WD and quiet, efficient 2WD at will, Pajero Sport is at home on any road.

LUXURY

TRUE 4X4

7 SEATER

PAJERO SPORT

Vehicle specifications may vary.

If the exterior of Pajero Sport hasn't already convinced you, one look inside should dispel any notions that this is a traditional SUV. Spacious and comfortable for driver and passenger alike, Pajero Sport doesn't trade driving pleasure or style for excitement. The elevated driver's position puts you in command of the road, so it is as much fun to be seen as it is to drive. Get in and step out.

THE SCENIC ROUTE

You're on top. The Pajero Sport combines an elevated driving position with a wide front windshield and luxurious styling, all of which give you extremely comfortable command of the road. And to make sure you are always in charge, the controls and gearshift are all ergonomically arranged around the wheel for intuitive operation while driving. At the centre of it all sits the meter cluster, attractively designed in red for maximum visibility in all conditions.

SPACE FOR AFRICA

ERGONOMICALLY DESIGNED GEARSHIFT

ATTRACTIVE METER CLUSTER

PAJERO SPORT

Convenient folding for 2nd and 3rd row seats (7-seater only).

To provide as much carrying space as possible, the 3rd row can be folded flat and 2nd row folded forward and out of the way. You can also fold down just one part of the 60-40-split, 2nd row for carrying extra long cargo. The 3rd-row seats can be easily folded and unfolded separately, giving you plenty of room for groceries, suitcases or bulky cargo, while still leaving lots of seating space for passengers.

CONVENIENT FOLDING

Vehicle specifications may vary.

SUVs have conventionally been known for off-road prowess and utilitarian cargo capacity rather than passenger comfort. Passengers stepping into the Pajero Sport, however, are in for a wonderful surprise, they are welcomed by a comfortable leather interior, with ample headroom and space

INNER ELEGANCE

to stretch their legs. Combined with available fully automatic air conditioning and MITSUBISHI SOUND SYSTEM, the only thing more fun than riding in a Pajero Sport is being in the driver's seat.

VERSATILE SEATING ARRANGEMENT

Your ride, Your friends, Your cargo-choice. Pajero Sport offers seating and carrying space as roomy as it is versatile, so you'll be ready no matter who or what is going with you. With all three rows set up, there's room for you and six passengers with ample storage space available at the rear. In addition, several other seating options are possible.

- A.** Fold the 2nd-row and 3rd-row seat completely flat to create a comfortable sleeping area for when you need to take a rest.
- B.** Fold the 3rd-row seats down flat to create a wide utility space while still having room for four passengers. (7 seater only)

SPACIOUS CARGO AREA

The spacious cargo area can fit even extra-large cargo, and the folding rear seats give you the extra room to handle an additional set of suitcases, golf bags or whatever else you need to carry. And with the easy-opening tailgate, loading and unloading everything is a breeze.

STEERING WHEEL AUDIO CONTROL

Volume, track selection and sound mode controls are arranged on the steering wheel for easy access, allowing you to optimise your listening environment without taking your hands from the wheel.

PAJERO SPORT

After earning a record breaking string of Dakar Rally victories, Mitsubishi is now synonymous with off-road mastery. This source of our success is no secret: it comes from unwavering dedication to developing the ultimate off-road handling and control technologies and perfecting them in the field under world competition conditions.

The end results are what make Pajero Sport so at home on rough and rugged terrain. It even has one of the smallest

SERIOUS OFF-ROAD PERFORMANCE

turning circles in the category. So you'll be able to travel through almost anything and come out on the other side.

We've known for centuries that the earth isn't flat, now Pajero Sport lets you leave the tarmac and see for yourself.

With on-demand 4WD for sure traction, a torsion-resistant rigid ladder frame for improved stability, and durable suspension for maximum balance, even the most forbidding ground can be covered with confidence.

4WD TRACTION

A double-wishbone front suspension with coil springs combined with a 3-link coil spring rear suspension, both with stabilizer bars, give unmatched traction and stability with a higher ground clearance for going off-road.

SUSPENSION DYNAMICS

1. Tougher, lighter frame beams

Pajero Sport uses beams made from thinner, lighter steel that provides all the strength of thicker beams, with less weight.

2. Impact-absorbing collapsible beads.

Built within the frame, they help absorb collision energy before it can reach the cabin interior, providing added protection for occupants.

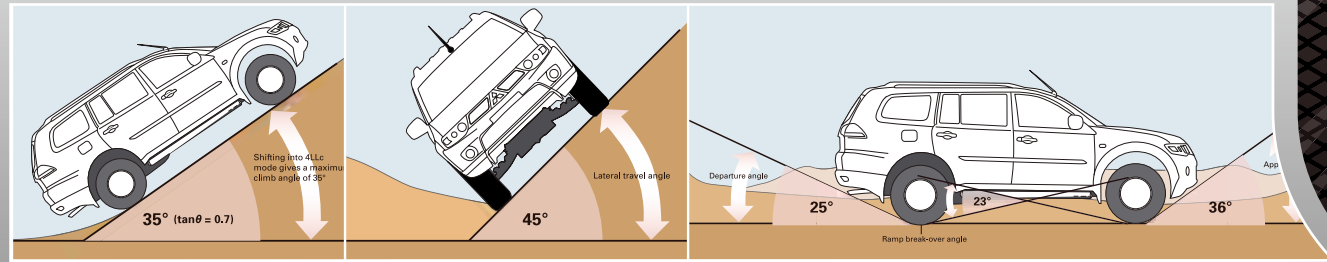

3. Front double-wishbone coil springs with stabilizer bar.

4. Rear 3-link coil springs with stabilizer bar.

TERRAIN HANDLING ABILITY

Some measure performance in seconds, some in millimeters, Mitsubishi measures in obstacles overcome and goals reached. Because challenges come in all shapes and sizes, Pajero Sport is designed to climb up, over, around and through the toughest terrain that nature can provide.

TURNING CIRCLE

Pajero Sport's remarkably tight 5.6 minimum turning radius gives drivers the ability to manoeuvre through tight spaces with ease.

PAJERO SPORT

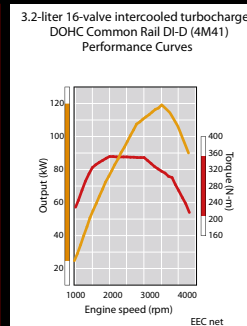

Whether cruising down the highway or climbing through a mountain pass, it all begins with power. To ensure that you're never without, Pajero Sport features a power

DYNAMIC POWER

The Common Rail fuel system delivers a precise, steady fuel supply to each cylinder, enabling maximum output with minimum waste for better efficiency and emission reduction. The computer-controlled feedback system allows for continual adjustment, ensuring peak performance at all times.

3.2-litre 16-valve Intercooled Turbocharged DOHC Common Rail DI_D (4M41)

The source of Pajero Sport's terrain-conquering power. Using a Common Rail direct injection system for more power and improved fuel efficiency, the 3.2 litre diesel engine delivers an impressive output. Common Rail direct injection feeds a high-pressure, precisely measured fuel supply directly to the cylinders, ensuring each receives the optimal amount. Electronically controlled injection with feedback optimizes fuel dispersion within the combustion chambers, allowing the system to make continual adjustments to run at peak efficiency. The result is controlled power output, with minimal emissions.

Outstanding low-end torque and full-range performance

Max output
120kW (163) / 3,500rpm

Max torque
343N-m / 2,000rpm

plant tough enough to meet any driver's needs. And because no two roads are the same, Super Select 4WD lets you shift between drive modes for optimum performance.

16-VALVE LAYOUT

Power-enhancing features give Pajero Sport the energy for high-performance driving enjoyment.

This arrangement creates a more complete air/fuel mixture and steadier flow for constant high performance. The precisely balanced roller rocker arms and scissor gears provide exact valve timing for more powerful combustion.

INTERCOOLER

The intercooler allows more air to be pumped to the cylinders, for more complete combustion and greater power. Positioned behind the front bumper, this design gives Pajero Sport improved air-cooling performance.

TURBOCHARGER

The turbo system adds an impressive boost to air intake pressure, producing more power from each cylinder stroke.

SUPER SELECT 4WD

Mitsubishi's rally-proven Super Select 4WD lets you move from smooth 2H mode highway performance to rugged 4H mode traction without breaking stride. With shift-on-the-fly convenience at up to 100km/h, the right driving mode is always at your fingertips.

2H (2WD High Range) For when you're cruising down the highway or just going across town, 2H mode shifts you into rear wheel drive for smooth, quiet, fuel-efficient performance.

4H (4WD High Range) When the weather turns bad and the roads get slick, switch to 4H mode for added traction. The dynamic 33:67 front/rear torque split gives you greater control for high-speed driving.

4HLc (4WD High Range with Locked Center Differential) Keeping you on track even in rugged or slippery conditions, the 4HLc mode distributes power equally to all 4 wheels for off-road excitement with a steady sense of control.

4LLc (4WD Low Range with Locked Center Differential) Switch to 4LLc when you need all the tractor-like crawling power you can get. Maximized low-end torque pulls you through even the roughest terrain, thickest mud and deepest snow.

INVECS-II 4 SPEED AT WITH SPORTS MODE

For drivers who prefer the convenience of an automatic, INVECS-II 4-speed automatic transmission provides smooth, intelligent shifting. INVECS-II shift control analyzes driving conditions to select the best shifting style, and can even study driving preferences to create a profile that matches driver characteristics. Sports Mode gives drivers direct command over gear shifts with all the control of a manual transmission and the convenience of an automatic.

PAJERO SPORT

MITSUBISHI MOTORS

Every adventure is a journey into the unknown, but that doesn't mean you can't be prepared. Even when things take an unexpected turn, Pajero Sport is designed to protect you and your passengers, with an array of safety features

CONFIDENT PROTECTION

from the Reinforced Impact Safety Evolution (RISE) body design to powerful brakes and front airbags for both driver and passenger. So get out there and explore.

BRAKES WITH VACUUM BOOSTER

For quicker stopping in all conditions, Pajero Sport features large front ventilated disc and rear drum brakes. With an added vacuum booster to multiply emergency stopping power, drivers can now feel confident and safe even when conditions turn hazardous.

DUAL SRS AIRBAGS

Because accidents can happen even when driving safely, Pajero Sport offers the protection of front SRS airbags for both driver and front passenger. Used together with the 3-point ELR seatbelts with pretensioners and force-limiters, they provide an excellent degree of collision safety.

EXTRA STRONG BODY CONSTRUCTION

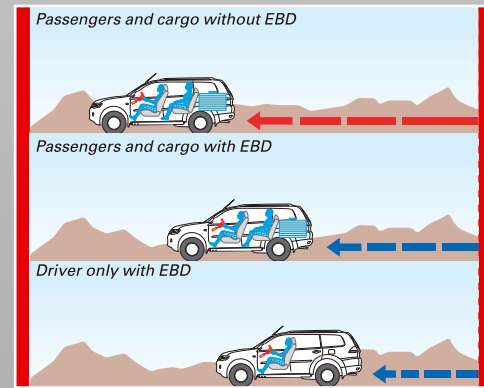

Pajero Sport uses high-tensile steel in key locations, creating an extra-rigid frame of beams and support pillars surrounding the cabin. The rigid beams help to direct damage around and away from the interior in the event of a collision.

- A. Collapsible A-pillar absorbs collision energy, so that less reaches the interior.
- B. Collapsible pedals reduce the risk of leg injury to drivers.
- C. Underfloor beams redirect collision energy around cabin.

ABS WITH EBD

ABS keeps wheels from locking to maintain control of the vehicle during hard emergency braking, preventing slipping and skidding. Electronic Brake-force Distribution (EBD) assist by redistributing braking force to the rear brakes as needed, enabling quicker stops even when carrying passengers and heavy loads.

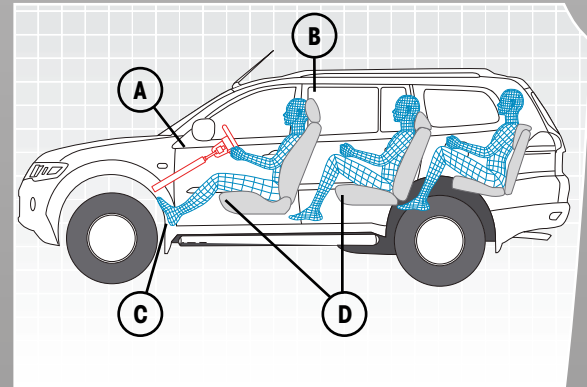

CONFIDENT PROTECTION

A. Collapsible steering column
The steering column helps protect drivers in frontal collisions by collapsing away from the interior to reduce the chance of driver injury, while the lower steering shaft compresses to absorb impact energy.

B. ELR seatbelts with pretensioners and force-limiters
The front row, 2nd-row side and 3rd-row seats are equipped with ELR (Emergency Locking Retractor) seatbelts to hold occupants securely in sudden stops. In a collision, the front pretensioners tighten when the airbags deploy to minimize movement, while force-limiters then gently release the seatbelt, reducing the chance of injury.

C. Anti-intrusion brake pedal
The brake pedal folds forward and inward during a frontal collision to help protect the driver's legs.

D. Side door impact bars
Thick side bars along the doors resist impact in the event of a side collision, helping to protect occupants.

When you take ownership of a Mitsubishi, you're not just driving a vehicle; you're joining an elite league. Introducing:

Mitsubishi DIAMOND PROMISE South Africa

Only the best Vehicle Warranty and Customer Care standards are offered to Mitsubishi Motors customers.

Parts, Dealers and Service

DIAMOND PROMISE GENUINE PARTS:

Only genuine Mitsubishi parts will be fitted during scheduled services performed by qualified Mitsubishi technicians – all parts carrying the Mitsubishi Genuine Parts 12-month, unlimited km, guarantee. This excludes wear and tear items.

DIAMOND PROMISE DEALER NETWORK:

With 47 dealers countrywide, Mitsubishi's never too far away.

DIAMOND PROMISE SERVICE:

Mitsubishi offers one of SA's best service intervals: 15 000km/6 months on petrol & 10 000km on diesel. Besides ensuring long-term reliability and safety for your Mitsubishi, our Scheduled Service Programme also helps protect the vehicle's resale value.

Help

DIAMOND PROMISE CALL CENTRE 24/7:

We're here to help 24/7 so just dial 0800 13 33 55 if you have any queries or for details of your nearest dealer.

HOW WE LOOK AFTER OUR OWN

DIAMOND PROMISE ROADSIDE ASSISTANCE:

Peace-of-mind is guaranteed throughout SA with our FREE 3 year/100 000km Roadside Assistance, offering repairs, towing and storage 24/7, 365 days a year.

Forward-thinking

DIAMOND PROMISE WARRANTIES:

Mitsubishi Motors South Africa offers a 3 year/100 000km New Vehicle Warranty.

DIAMOND PROMISE FINANCE:

A specialist range of preferential finance options developed by Mitsubishi Motors Finance and *Insurance, a division of Mercedes-Benz Financial Services take the burden out of financing your latest Mitsubishi.

DIAMOND PROMISE LEASING:

Our tailored fleet Leasing Services offer innovative and competitively priced packages like: Roadside Assistance, Specialist Maintenance, Accident and Claims Management, Optional Insurance and more.

DIAMOND PROMISE INSURANCE:

With the backing of market leader, Mercedes-Benz Risk Solutions, a division of Mercedes-Benz Financial Services, Mitsubishi owners are offered Vehicle Comprehensive, Shortfall Cover and Credit Life Cover.

DIAMOND PROMISE SERVICE & MAINTENANCE PLAN:

Tailored Service and Maintenance Plans are available on all Mitsubishi models.
